

Eyelash Extensions

Used to enhance the length, curliness, fullness, and thickness of natural eyelashes. The extensions may be made from several materials including mink, synthetic, or horse hair. The main method of applying the extensions on is by using an adhesive glue to individually sticking them to the eyelashes one-by-one. This is to prevent the eyelashes from sticking together. False eyelashes and eyelash extensions are **not** the same.

Types and style of lashes?

False eyelashes and semi-permanent eyelash extensions both enhance the length and volume of eyelashes, although they differ in various ways.

- ★ ***Classic lashes*** are a 1:1 ratio of ***one*** extension applied to ***one*** natural lash.
- ★ ***Hybrid lashes*** are classic lashes and volume fan lashes ***mixed*** together.
- ★ ***Volume lashes*** are 2-6 thin eyelash extensions which make a ***fan shape*** to allow for a look of full fluffy lashes.

Appearance.

Eyelash extensions give the appearance of having mascara on without the messy clumps and smudging of makeup.

Generally, a single lash is applied to each natural lash. When applied properly, neither the eyelash extension nor the glue should touch the eyelid because it may cause irritation.

How long do they last?

Extensions were designed to last until the lashes naturally fall out, which is usually around 3–4 weeks. ***After those 3-4 weeks, new lash growth will need to be bonded, making lash extensions a regular monthly service if one wishes to maintain the full look.***

How Long does the process take?

An average person might have anywhere from one hundred to two hundred lashes per eye, it can take from ***two to three hours to attach a full, new set.*** The amount of lashes one can put on varies upon the existing natural healthy eyelashes.

This service is done with your eyes closed. In order to get this service you need to be ok with keeping your eyes closed and laying down not moving for 3 hours.

F.A.Q's

WILL EXTENSIONS DAMAGE MY LASHES?

They will not damage your eyelashes if they are applied correctly. Choosing the proper curl and diameter and using the right amount of adhesive prevents damage, so be sure to find a professional and certified artist.

CAN I USE AN EYELASH CURLER ON MY EXTENSIONS?

No, there will be no need, because they come in different curls to give you the look you want without an eyelash curler. If you do use one it will cause lash damage.

HOW SHOULD I SLEEP?

I recommend sleeping on your back. If you're a side sleeper we recommend using the Beaute Sleep Mask which is 20.00 upon ordering so please let me know at appointment. Until you get your beaute sleep mask you are recommended to sleep on your back or edge of the pillow.
